

MISSION

To provide quality, efficiency and professional service to all our customers and partners in their water, well and pump construction needs.

SERVICES OFFERED

Well Construction

Well Rehabilitation

Well Abandonment

Pump Sales and Service

Crane Service

PUMP SERVICE

Whether it's the removal of a vertical turbine pump assembly or the installation of a 6-inch check valve, no job is too big or small. Our on-site field crews excel in the installation, maintenance and sales of most major brands of pumps, motors, valves and other pump related materials. Earning your business is our goal. Serving all your well or pump issues is our pleasure.

CRANE SERVICE

We will lift you up! We offer boom truck service with certified operators that can tackle those smaller jobs that you just can't do without a little bit of help.

WELL CONSTRUCTION

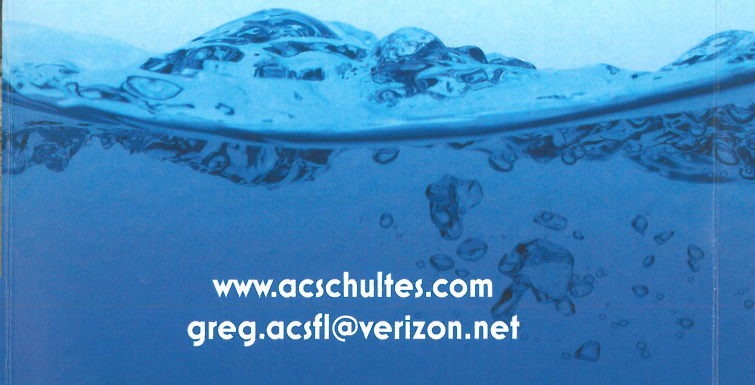

Our specialized equipment allows for various drilling methods to conquer the difficulties encountered while drilling in the Floridan aquifer.

- Direct Mud Rotary
- Reverse Air Rotary
- Dual Rotary Drilling
- Packer Testing
- Coring Capabilities

WELL REHABILITATION

We service a broad range of water wells with dropped capacities that require rehabilitation to "revive" the well. We can precisely complete chemical and mechanical redevelopment techniques including:

- High velocity jetting
- Swabbing
- Brushing
- Well Acidification
- Pump development
